

SAINT ANNE'S TERRACE

MEMO

TO: Residents/Families
FROM: Terri Monroe
Date: August 6, 2020
Subject: Terrace Reopening Update

On July 31st Governor Kemp changed his Executive Order that was due to expire that day. The new Executive Order for the medically fragile date has been extended to September 10th at 11:59 p.m. Due to the extension of the Governor's order, we are going to leave our current soft opening as is for the present time.

We are still tweaking how we use our Viral-Sign equipment. We have made a few changes in how we are utilizing this tool. **Starting immediately, when residents go off property, they will need to be scanned every day for 7 days, verses just upon reentering the building.** For example: If a resident goes off property for an hour and is exposed to a virus, it may not show up on the initial scan upon their return to the building that same day. To be on the safe side we have decided to make this change so we can effectively monitor if someone starts to exhibit symptoms. Also, if you are not feeling well whether you have been out of the building or not, please come down and allow us to scan you.

If you have any questions or concerns, please call Terri Monroe or David Brooks at 404-238-9200.
